

## Programming 2

### Tutorial 6

**IMPORTANT:** You will need the following documents to complete this tutorial.

*Assignment 1b specification*

*Assignment 1a sample solution*

*Printouts of the provided source code*

**Tutorial:** Compare your assignment 1a solution to the provided model solution paying special attention to the following:

- The individual classes in terms of attributes and methods
- The relationship between classes and how they will be implemented using specific JCF classes
- The use of abstract classes and interfaces
- How the structure of the test harness affects the solution

**Prac:** Work on Assignment
